more choice in affordable pOWER.

# More Choice in Affordable Power.

## THE POWER TO FULFILL MORE NEEDS

### A Full Range of Power, High Power and Super Power Instruments

Recommending the right hearing instrument to clients with severe to profound hearing losses presents unique challenges – with affordability often among the key demands. Unitron Hearing answers the need for effective yet affordable instruments in the Power category. Our Power line-up offers a complete family of accessible choices, including the most recent and innovative addition, Unison High Power.

## UNISON HIGH POWER

### More Choice, More Listening Environments

Unison High Power is ideal for clients with severe to profound hearing losses who are seeking an affordable digital instrument that allows them to participate in more listening environments. It offers:

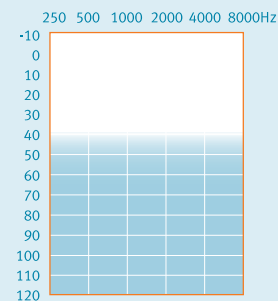

- ▶ Three models to suit different lifestyles and budgets
- ▶ Affordable digital with high-value features, including directionality
- ▶ Choice of feedback management technologies
- ▶ Smaller, more attractive BTE with longer battery life

#### Digital Features Open New Doors

Unison HP offers the same set of high-value digital features as the Unison 6–3–Essential series:\*

- ▶ **Multiple bands and channels:** six bands and up to six channels
- ▶ **Multiple listening programs:** up to three listening programs
- ▶ **Dual directional microphone system:** may be programmed into any of the listening programs
- ▶ **Adaptive feedback canceller:** automatically attacks multiple feedback peaks for greater comfort
- ▶ **Multiband feedback manager:** addresses fit-related feedback
- ▶ **Practical extras:** including on/off manual volume control, ideal volume indicator and intelligent power management

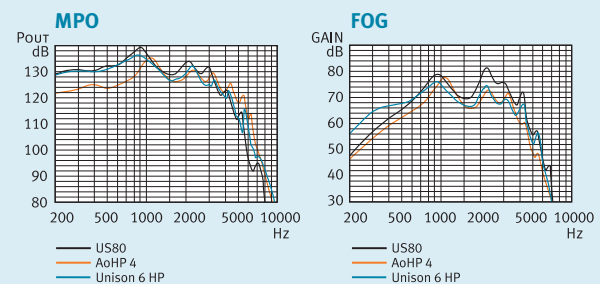

\*Features vary by model.

#### UNISON 6–3–E HIGH POWER BTE

dB SPL 2cc	Peak Gain	76 dB
	Peak Output	138 dB

#### Power in all the Right Places

Unison HP addresses a broad frequency response to satisfy the specific listening needs of those with severe to profound hearing losses. By providing optimal gain in the low frequencies, Unison HP delivers improved sensation of power, while high frequency averages maximize the audibility of speech cues.

*Unison High Power and Unison Power feature small, attractive BTEs*

## UNISON POWER

### Same Desirable Feature Set, Same Affordable Price

For clients with less severe hearing losses who prefer an even smaller BTE, Unison Power offers the same attractive feature set and the same choice of three models as Unison HP.

## BREEZE POWER

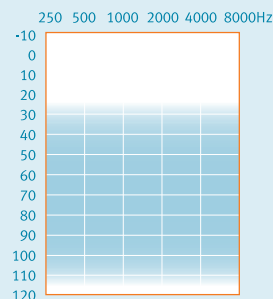

### The Basic Digital Power Instrument

Breeze Power is ideal for budget-conscious clients seeking a digital instrument. Breeze Power is a basic digital instrument that offers digital sound quality plus the ease of conventional, trimmer controlled fittings for a quick, precise fit. A choice of pre-set processing strategies (AGCo or Linear) allows you to select the best approach for individual needs.

## US80 SUPER POWER

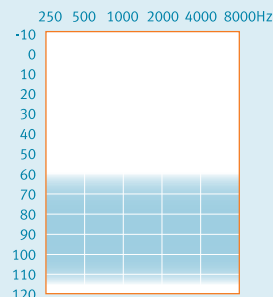

### Super Power Analog for Profound Losses

For the most profound losses, US80 offers two versions: US80PP with a wideband frequency response; and US80PPL with an extended low-frequency emphasis suitable for left corner audiograms. A powerful Push-Pull amplifier provides linear amplification with output compression limiting. Four trimmer controls provide fitting flexibility and permit customization.

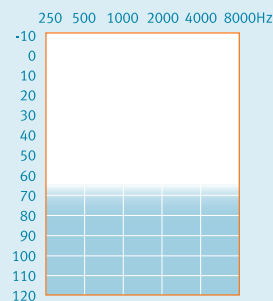

**UNISON 6-3-E POWER BTE**

dB SPL 2cc	Peak Gain Peak Output	70 dB 135 dB
------------	--------------------------	-----------------

**BREEZE POWER BTE**

dB SPL 2cc	Peak Gain Peak Output	75 dB 133 dB
