

UH open

For a winning performance

Unitron Hearing is committed to bettering the lives of people with hearing loss by developing high-quality hearing solutions that incorporate practical features to solve the everyday problems and concerns they have with hearing loss and hearing aids. This commitment also benefits you, the hearing healthcare professional, with practical fitting options, support when you need it and the ability to offer solutions that address what matters most to your clients.

Open style. Total performance. Much more choice.

Win a new set of clients with the most extensive family of open hearing instruments

Today's lightweight, inconspicuous, open fitting hearing instruments serve up a tremendous opportunity to win over a new segment of clients, including those with high frequency hearing losses and those concerned about cosmetics.

Unitron Hearing offers the most extensive family of fully-featured, open fitting products available. Six open fitting products at three price points – starting in the entry level category – put the advantages of an open fit within reach of even more clients.

The advantages of an open fit

- ▶ Virtually invisible slim tube open fittings are stylish and comfortable
- ▶ Occlusion-free fittings yield more natural sound
- ▶ In-clinic slim tubes and domes allow same-day fittings
- ▶ No impressions or custom earmolds

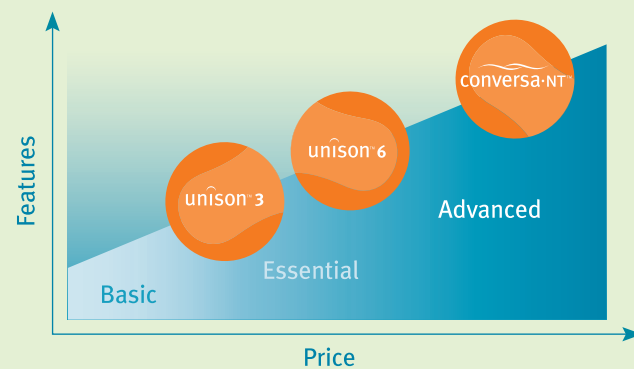

UH open advantages

- ▶ **More choice** – six open fitting products: three price points, from entry to mid-level, each in two BTE styles
- ▶ **Fully featured** – the same set of high-value features found in Conversa.NT™, Unison™ 6 and Unison™ 3
- ▶ **Style** – choice of BTE colors, including contemporary metallics, in both Moda™ 10A and 13 No VC
- ▶ **Easy-fitting** – user-friendly Unifit™ fitting software with a high frequency hearing loss correction tool, for all Conversa.NT and Unison models

Open options

Our fully featured, open fitting product line-up is available in the widest variety of price points, and offers a choice of the ultra-small Moda 10A BTE or the small and stylish 13 BTE.

Six open products, two styles, three price points.

Unitron Hearing gives you six open products from which to choose: fully-featured Conversa.NT, Unison 6 and Unison 3 hearing instruments, styled in both the ultra-small Moda 10A BTE and the small and stylish 13 BTE.

conversa·NT™

A mid-level instrument with advanced features for clients who communicate in diverse and often challenging listening situations.

Key Features

- ▶ AutoMic
- ▶ adaptive beamformer
- ▶ speech enhancement
- ▶ intelligent noise reduction
- ▶ realtime feedback canceller

unison™ 6

A high-value, feature-rich affordable instrument designed for active clients.

Key Features

- ▶ choice of four processing strategies
- ▶ three listening programs
- ▶ dual directional microphones
- ▶ noise reduction
- ▶ adaptive feedback canceller

unison™ 3

A very affordable instrument for clients exposed to fewer listening environments.

Key Features

- ▶ two processing strategies
- ▶ three listening programs
- ▶ dual directional microphones
- ▶ adaptive feedback canceller

Need more than a 10A BTE?

Now you can offer an open fit to clients who need more than a 10A BTE, either due to battery life requirements or to enable direct audio input. Our complete open product family is also available in a small and stylish 13 BTE style to satisfy these requirements.

Fit for the future

Practical Bonus: when you fit a client with one of our open hearing instruments and the hearing loss progresses, in most cases you'll be able to satisfy the new requirements with just a simple switch to traditional earmolds and a few changes within Unifit fitting software.
